

Press Release

Elgin, May 2017

Winergy offers technical know-how in Factory Training Program

Winergy maintains a highly skilled staff of competent, trained technicians and gearbox specialist for the purpose of maintenance and repair of Winergy products. The Winergy Factory Training Program now offers this exclusive know-how as technical training to preferred Winergy vendors and customers to improve their strengths, abilities and skills in maintenance and repair of Winergy gearboxes. In connection with original Winergy spare parts and up-tower tools it enables customers to perform professional service on their own equipment and lets them reduce their LCoE.

The right training for everyone

Winergy Factory Training Program features a variety of training modules designed to meet a customer's request for skilled maintenance, up-tower repair or failure analysis. They range from basic level for general understanding of Winergy gearbox configuration to standard level for exchange of the main gearbox parts to advanced level including special tooling for up-tower gearbox services.

About Winergy

Winergy is headquartered in Voerde, Germany, and is the leading drive train component manufacturer for wind turbines. It has supplied more than 125,000 MW gearboxes worldwide. With more than 35 years of experience, Winergy offers gearboxes, HybridDrives, couplings, and services to wind turbine manufacturers and wind park owners. The product portfolio covers power ratings between 750 kW and 9 MW. This is complemented by a high quality professional service portfolio. Production and service sites are located in Europe, China, India, and the U.S., while the base of service locations expands continuously on a global level.
